

RESCUE SWIMMER MASTER CLASS IN CHARLOTTE, USA IN 2014

The KDI Rescue Swimmer program is the ultimate in training for First Responders whether Fire, Police or Rescue Squad. Unique, challenging and comprehensive this course prepares the rescuer for a large variety of rescue situations including surf, rocky shorelines, boat and shore deployments, flood conditions and moving water. There is no other comparable program anywhere. Rescue Swimmer deployment from helicopters and the recovery of the victim and Swimmer to the helicopter is also available.

Water Rescue - Awareness Level:

Basic water safety and rescue training is a must for any department having a mandate to respond to water emergencies. All First Responders who may be called to a water emergency as part of a department response should be certified to at least this basic level.

Water Rescue - Operations Level:

Departments conducting water rescue operations where rescuers enter the water for hands on or near-shore swimming rescues, or use boats as part of the rescue operation should have individuals qualified to the Operations Level.

Water Rescue – Technician Level:

Technicians are trained in addition essential skills, especially for more complex environments. These include rigging systems and more advanced rope work, night and limited visibility operations, coordinating with a variety of water craft and working with victims on rocky shorelines. This program is both challenging and physically demanding. In addition Technicians have the skill and knowledge to plan, supervise and direct rescue operations in many water rescue environments.

Real world training for real world rescue taught by highly experienced, working Rescue Swimmers.
